Fleet Vehicle Tracking

Fleet tracking systems allow the end user to live track their fleet and generate a host of historical reports and data.

Seltrak is our preferred premium fleet tracking system, we can also offer a more basic system.

The tracking units will report in every 2 minutes using GPRS giving, GPS position, speed, direction, and ignition status. Our driver behaviour units will also produce a Driver Score report, this will include data such as harsh acceleration and braking.

For customers who require specialist features such as switch reports for example PTO report will show when the PTO pump has been used

Standard Reports (SelTrak)

- Journey Report
- Time on Site
- Overspeed
- Idling
- Late Start
- Tamper Report
- Journey Cost Report
- Speed Limit Report
- Odometer Report

Additional features include reports via email, service reminders and geofence alerts.
